Professional Summary

Full Stack Developer with 1 year of experience in developing scalable web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js). Skilled in building RESTful APIs, frontend-backend integration, JWT authentication, and responsive user interfaces using React.js, Next.js, Tailwind CSS, and Bootstrap. Experienced in state management, database handling, debugging, and performance optimization with a strong understanding of clean code and MVC architecture.

Technical Skills

Languages: JavaScript (ES6+), TypeScript (Basic)

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, Context API

Backend: Node.js, Express.js, REST API Development, MVC Architecture

Databases: MongoDB, Mongoose, MySQL

Authentication: JSON Web Token (JWT), Role-Based Access Control

Tools: Git, Postman, Render

Concepts: API Integration, Performance Optimization, Responsive Design, Clean Code (DRY)

Experience

- **Full Stack Developer** — Agnistoka May 2025 – Present
 - Developed and maintained responsive UI components using React.js and Tailwind CSS, improving user experience and interface consistency.
 - Integrated frontend applications with backend APIs to ensure efficient data flow and optimized performance.
 - Tested and debugged REST APIs using Postman, improving API reliability and reducing errors.
 - Managed application state using Redux and Context API to enhance scalability and maintainability.
 - Collaborated with backend teams and worked with MySQL databases for data validation and management.

Projects

- **AI Interview Agent (SaaS Platform)** — MERN Stack, OpenRouter, Razorpay GitHub
 - Developed an AI-powered platform that generates personalized interview questions based on resume analysis.
 - Designed and implemented REST APIs for resume processing, interview generation, and report tracking.
 - Implemented secure authentication using Firebase for user session management.
 - Integrated Razorpay payment gateway for credit-based feature access.
 - Developed responsive UI using React.js and deployed application on Render.
- **Role-Based Task Management System** — MERN Stack GitHub
 - Developed a task management system with role-based dashboards for Admin and Intern users.
 - Built REST APIs for task creation, assignment, and tracking.
 - Designed MongoDB schemas using Mongoose for users, roles, and tasks.
 - Implemented JWT-based authentication and role-based access control.
 - Improved system performance through debugging and optimization.
- **Online Auction Platform** — MERN Stack GitHub
 - Developed an auction platform allowing users to create listings and place bids in real time.
 - Implemented backend logic for bid management and dynamic price updates.
 - Created REST APIs for auctions, users, and bid history management.
 - Used MongoDB for efficient storage and retrieval of auction data.
 - Ensured smooth user experience through testing and bug fixing.

Education

Bachelor of Technology in Computer Science

ITM College, RGPV

2024

CGPA: 8.0 / 10
